6-Will people live on the moon ? scientists say it is possible and necessary. They say that we will soon need more energy than the earth's oil, coal and gas can give us. The world's population is growing all the time at current rates of growth it will be over ten billions by 2050, that's about double what it is today. We will need more energy and space is a good place to get it. How will people ilve in space? And how will they get all this energy scientists want to build huge space cities where thousands of people can live and work just like they do on earth , they will collect the sun's energy and transmits it back to earth .

Unfortunately there is one big problem , there is no gravity . without gravity, everything floats around and life is impossible . Scientists have got the solution to this problem.

Answer the following questions

1- Give a suitable title to the passage.

What is happening to the world's population?

What is the main difficulty about living in space?

Choose the bets answer

To live in the moon we need ..... sources of energy.

- a) old                      b) past                      c) renewable                      d) no

Without gravity life in space would be.....

- a) possible                      b) reliable                      c) easy                      d) impossible

### the spiders

### answer the following questions
